Marp slide deck

It will blow your f*& mind 🚀 🤯

By: Chris

new slide

- one
- two
- three

Code

```python
from pydantic import BaseModel

class Lover(BaseModel):
    name: str
    age: int

def fetch_love(lovers: List[Lover], seed: int):
    """TODO"""
    if seed < len(lovers):
        return lovers[seed]
    else
        return None
```

Maths

Some maths I like

$$\lambda = \frac{1}{\sqrt{2\pi}\sigma} \times e^{0.5 \times \left(\frac{(x-\mu)}{\sigma}\right)^2}$$

and more I dislike

$$x = Sapiens$$
$$Sapiens = Stupid$$
$$x = Stupid$$
